Exam : **C5050-285**

Title : IBM Cloud Platform
Application Development V1

Vendor : IBM

Version : DEMO

NO.1 Which step must be taken in an application to use the IBM Single Sign On service for Bluemix PaaS?

- A. implement an authentication callback
- B. implement a login form requesting User ID and password
- C. configure the OAuth 2.0 client with the SSO service credentials
- D. securely store user credentials used for the external authentication

Answer: D

NO.2 A team of developers is working on a single repository in IBM Bluemix DevOps Services. Which DevOps feature should be used to confirm the integrity of their source code by running tests every time code is delivered to the shared repository?

- A. Source Control: Test code upon commit
- B. Web IDE: Enable Automatic Unit Testing
- C. Delivery Pipeline: Configure a build stage
- D. Track & Plan: Create a Work Item of type Test

Answer: A

NO.3

Create a project

laksri | 

Create a new repository or link to an existing one 

Create a new repository

Link to an existing repository

When creating a new project in IBM Bluemix DevOps Services, which action is performed when Link to an existing repository is selected?

- A. An existing GitHub repository is linked to the project by giving IBM DevOps Services access to a specified GitHub account.

- B. An existing Git project on the developer's local machine is linked to the project.
- C. An existing GitHub repository is linked to the project using anonymous access.
- D. An existing user's project in IBM DevOps Services is linked to the project.

Answer: A

NO.4 Based on the Twelve-Factor App methodology, where is the best place to store external configuration credentials in IBM Bluemix PaaS?

- A. in the source code
- B. in a user configuration file
- C. in an application database
- D. in the VCAP_SERVICES environment variable

Answer: D

Explanation:

Provide any additional configuration information through the VCAP_SERVICES environment variable. Services that are bound to an application also populate VCAP_SERVICES with their configuration attributes.

NO.5

A developer has an application based on the Liberty profile running in IBM Bluemix PaaS.

The developer wants to maintain high availability on HTTP sessions.

What is the benefit of using IBM Bluemix Session Cache service?

- A. Session data is shared across different browsers.
- B. Session data is automatically stored in remote file systems.
- C. Session data is encrypted and stored in a MySQL database.
- D. Session data is recovered after an application instance crashes.

Answer: B
